

**Class XII**  
**Economics (030)**  
**Sample Question Paper 2018-19**

**MM: 80**

**Time Allowed: 3 hours**

**General Instructions:**

- i. All questions in both sections are compulsory. However, there is internal choice in some questions.
- ii. Marks for questions are indicated against each question.
- iii. Question No.1-4 and 13-16 are very short answer questions carrying 1 mark each. They are required to be answered in one sentence.
- iv. Question No.5-6 and 17-18 are short answer questions carrying 3 marks each. Answers to them should not normally exceed 60 words each.
- v. Question No.7-9 and 19-21 are also short answer questions carrying 4 marks each. Answers to them should not normally exceed 70 words each.
- vi. Question No.10-12 and 22-24 are long answer questions carrying 6 marks each. Answers to them should not normally exceed 100 words each
- vii. Answers should be brief and to the point and the above word limit be adhered to as far as possible.

<b>SECTION A – MICROECONOMICS</b>		
1	State the reason why Total Variable Cost (TVC) curve and Total Cost (TC) curve are parallel to each other.	1
	<b>Or</b>	
	State the reason behind U-shape nature of Average Variable Cost curve.	
2	If the Total Revenue of a firm increases by ₹ 45,000 due to an increase in sale of Good X from 50 units to 65 units, then marginal revenue will be ₹.....?	1
3	A Production Possibility Curve would be..... curve if all the available resources in an economy are equally efficient to produce both the goods. <b>(Choose the correct alternative)</b> a) a straight line    b) convex to origin c) concave to origin    d) upward sloping	1
4	Which of the following is a variable cost? a) Salary of permanent staff    c) licence fees b) rent of premises    d) wages	1
	<b>Or</b>	
	If total variable cost and total fixed cost of producing 10 units are ₹500 & ₹200, the value of average cost would be? a) 50                      b) 70 c) 20                      d) 80	
5	Distinguish between Normative Economics and Positive Economics, with suitable examples.	3
	<b>Or</b>	
	Why do central problems arise? Discuss briefly.	
6	Mr. Atal Singh is consuming two goods X and Y. If he is facing a situation of $\frac{MU_X}{P_X} > \frac{MU_Y}{P_Y}$ , discuss how would he reach the level of equilibrium.	3

7	Calculate and Comment on nature of Price elasticity of demand, if, with a rise in price of Good X from ₹ 10 to ₹ 12, the quantity demanded falls by 40%.	4																								
	Or																									
	‘As the price of a good falls, the resulting increased purchasing power may be a reason for increase in quantity demanded’. Do you agree with the given statement? Give reason for your answer.																									
8	Complete the following production schedule: <table><tr><th>Units of variable input</th><th>Total Physical Product (units)</th><th>Average Physical Product (units)</th><th>Marginal Physical Products (units)</th></tr><tr><td>1</td><td>10</td><td>10</td><td>--</td></tr><tr><td>2</td><td>--</td><td>11</td><td>12</td></tr><tr><td>3</td><td>--</td><td>--</td><td>8</td></tr><tr><td>4</td><td>35</td><td>--</td><td>--</td></tr><tr><td>5</td><td>--</td><td>--</td><td>-5</td></tr></table>	Units of variable input	Total Physical Product (units)	Average Physical Product (units)	Marginal Physical Products (units)	1	10	10	--	2	--	11	12	3	--	--	8	4	35	--	--	5	--	--	-5	4
Units of variable input	Total Physical Product (units)	Average Physical Product (units)	Marginal Physical Products (units)																							
1	10	10	--																							
2	--	11	12																							
3	--	--	8																							
4	35	--	--																							
5	--	--	-5																							
9	Elaborate the price discrimination feature of monopoly.	4																								
	Or																									
	Why is number of firms limited in an oligopoly market? Explain.																									
10	a) Explain with the help of a hypothetical numerical example the assumption of diminishing marginal rate of substitution under the ordinal approach of theory of consumer’s behaviour. b) Why should marginal rate of substitution diminish for a stable consumer’s equilibrium?	4 2																								
11	Suppose the market for Good X is in equilibrium. Explain the chain effect, if: a) increase in market demand is less than the decrease in market supply. b) increase in market demand is more than the increase in market supply.	6																								
12	Examine the effects of the following on the supply curve of a Good X, using suitable diagram: a) fall in own price of Good X. b) rise in price of factor input producing Good X.	6																								
	Or																									
	Define Producer’s Equilibrium. Discuss briefly, the conditions of producer’s equilibrium, assuming that the producer can sell more units of the good by lowering the price.																									
SECTION B – MACROECONOMICS																										
13	Calculate the value of money multiplier if the legal reserve requirements are 20%.	1																								
14	What is money supply?	1																								
	Or																									
	What is meant by Reverse Repo Rate?																									
15	..... (choose the correct alternative) is a revenue receipt of the	1																								

	<p>government.</p> <ul style="list-style-type: none"> <li>a) Funds raised by the government by issuing National Saving Certificates</li> <li>b) Sale of 40% shares of a public sector undertaking to a private enterprise</li> <li>c) Profits of LIC, a public enterprise</li> <li>d) Amount borrowed from Japan for construction of Bullet Train.</li> </ul>	
16	<p>Identify which of the following statements is true?</p> <ul style="list-style-type: none"> <li>a) Fiscal deficit is difference between planned revenue expenditure and planned revenue receipts</li> <li>b) Fiscal deficit is difference between total planned expenditure and total planned receipts</li> <li>c) Primary deficit is the difference between total planned receipt and interest payments.</li> <li>d) Fiscal deficit is the sum of primary deficit and interest payment.</li> </ul>	1
17	<p>Estimate the value of Aggregate Demand in an economy if:</p> <ul style="list-style-type: none"> <li>a) Autonomous Investment (I) = ₹100 Crore.</li> <li>b) Marginal Propensity to Save = 0.2</li> <li>c) Level of Income (Y) = ₹4,000 crores.</li> <li>d) Autonomous Consumption Expenditure (c) = ₹50 Crore</li> </ul> <p style="text-align: center;"><b>Or</b></p> <p>In an economy <math>C = 200 + 0.5 Y</math> is the consumption function where C is the consumption expenditure and Y is the national income. Investment expenditure is ₹ 400 crores. Is the economy in equilibrium at an income level ₹ 1500 crores? Justify your answer.</p>	3
18	<p>Explain how the level of effective demand is attained in an economy if, Aggregate Demand is more than the Aggregate Supply.</p>	3
19	<p>What is meant by problem of double counting? How this problem can be avoided?</p> <p style="text-align: center;"><b>Or</b></p> <p>Discuss briefly, the circular flow of income in a two sector economy with the help of a suitable diagram.</p>	4
20	<p>Elaborate 'economic growth' as objective of government budget.</p>	4
21	<p>How the following tools can be used for credit control by the central bank in an economy:</p> <ul style="list-style-type: none"> <li>a) Open Market Operations</li> <li>b) Margin Requirements</li> </ul>	4
22	<ul style="list-style-type: none"> <li>a) State any two precautions that must be taken into consideration while estimating national income by value added method.</li> <li>b) In an economy, following transactions took place. Calculate total consumption expenditure of households and value added by Firm B: <ul style="list-style-type: none"> <li>i. Firm A sold to firm B goods of ₹ 80 crore; to firm C ₹ 50 crore; to household ₹ 30 crore and goods of value ₹ 10 crore remains unsold</li> <li>ii. Firm B sold to firm C goods of ₹ 70 crore; to firm D ₹ 40 crore; goods of value ₹ 30 crore were exported and goods of value ₹ 5 crore was sold to government.</li> </ul> </li> </ul>	2 4

	<b>Or</b>	
	Differentiate between National Income at Current Prices and National Income at Constant Prices. Which of the two presents a better view of the economic growth of economy and why?	6
23	How an initial increase in investment affects the level of final income of the economy. Show its working with a suitable numerical example.	6
24	<p>a) <b>According to recent media reports:</b></p> <p><b>‘USA has accused China of currency devaluation to promote its exports’.</b></p> <p>In the light of the given media report comment, how exports can be promoted through the Currency devaluation?</p> <p>b) What is meant by ‘official reserve transactions’? Discuss their importance in Balance of Payments.</p>	<p>3</p> <p>3</p>
